Using the first column, find the row with the number of people in your family, follow the row until you find the range your yearly income falls into. At the top of that column is the percentage of the charge that you will be responsible for. For example, a family of 4, with a yearly income of \$20,000 would be responsible for paying 40% of the charge, which is shown in the “Administration Fee” column in the table above.

This model fee scale is effective April 19, 2012. For family units with more than 8 members, add \$7,326 for each additional family member.
